PROFESSIONAL SUMMARY

Game developer with 6+ years of experience in Unreal Engine, specializing in AI systems, single-player narrative games, VR and multiplayer metaverse experiences. Led the development of games launched on Steam and independently publishes Unreal Engine C++ plugins on Fab, covering on-device LLM-driven NPCs, volumetric 3D navigation and offline AI sound generation. Strong in game mechanics, performance optimization and AI programming. Seeking a position at a leading game studio to build cutting-edge game AI, VR and immersive gameplay systems.

PROFESSIONAL EXPERIENCE

Game Developer

2024 – Present

Future Studio Bangladesh, Dhaka, Bangladesh

- Develop Metaverse and Virtual Reality (VR) projects using Unreal Engine.
- Build persistent virtual worlds featuring avatar systems, voice chat, virtual economies and social hubs that support real-time multiplayer interaction.
- Collaborate with international teams to integrate marketplace systems, networked experiences and gamified learning environments.

VR Developer

2024

VincatsBD, Dhaka, Bangladesh

- Developed interactive VR experiences for Meta Quest, focusing on immersive game environments and interaction design.
- Optimized VR applications to maintain high, stable performance.
- Collaborated with a South Korea-based team on the development and refinement of VR gaming solutions.

Senior Game Developer & Team Lead

2020 – 2024

SpinOFF Studio, Dhaka, Bangladesh

- Led the development of single-player narrative games, managing game design including quest systems, storylines and mechanics.
- Designed and programmed advanced AI systems to create immersive, engaging player interactions.
- Owned game optimization to ensure smooth performance across platforms, and launched games on Steam.
- Mentored junior developers and coordinated cross-functional teams to deliver high-quality projects on tight deadlines.
- **Key achievement:** Led the development and launch of a single-player game on Steam that received positive reviews for its gameplay and optimization.

PUBLISHED UNREAL ENGINE PLUGINS — FAB MARKETPLACE

Independent developer and publisher of Unreal Engine 5 C++ code plugins (Runtime and Editor modules) with full Blueprint and C++ APIs. Store: [fab.com/sellers/Tasfiqur Rahman](https://fab.com/sellers/Tasfiqur%20Rahman)

- **Local Mind AI** — Runs a large language model fully offline inside the game to power NPCs. The model runs in a crash-isolated helper process with auto-restart, and supports streaming conversations, vision input, voice in/out, tool calling that triggers gameplay functions, grammar-constrained JSON output and semantic memory.

- **AeroNav 3D** — Volumetric 3D pathfinding for flying, underwater and zero-g AI. Bakes a Sparse Voxel Octree in the editor with multithreaded voxelization, uses A* with line-of-sight path smoothing, and provides async worker-thread queries and a path-following component.
- **Infinity Local Sound AI** — Editor tool that generates game-ready sound effects from text prompts, fully offline on the GPU (Vulkan, with CPU fallback). Includes a non-destructive waveform editor and 24-bit WAV export.

PROJECTS

Bangladesh Liberation War Game
Government-sponsored historical game

Bangladesh ICT Game Project

- Key developer responsible for coding, debugging and team collaboration on a government-sponsored historical game.
- Ensured smooth functionality and immersive gameplay while maintaining historical accuracy throughout the storyline. Earned a certificate of project completion.

FUBG — Multiplayer Game
Online multiplayer game

Steam

- Contributed to the development of FUBG, a multiplayer game published on Steam.
- Focused on game mechanics, server integration and collaborative debugging to ensure stable online multiplayer functionality.

TECHNICAL SKILLS

Game Development	Unreal Engine 5 (C++ & Blueprint), Gameplay & AI Systems, Multiplayer, Game Optimization, UI/UX Development, VR/AR Development
Engine & Tools Dev	Runtime and Editor plugin development, Multithreading & async tasks, 3D pathfinding (Sparse Voxel Octree, A*), On-device AI/LLM integration
Programming	C, C++, Java (Swing), App Development
VR Platforms	Meta Quest, Oculus VR
Tools & Software	Git, Subversion (SVN), Cinema 4D
Other	Team Leadership & Mentoring, Project Management, Steam Game Publishing

EDUCATION

Bachelor of Science in Computer Science and Engineering (B.Sc.)
East West University, Dhaka, Bangladesh

Graduated 2024

LANGUAGES

Bangla: Native | **English:** Fluent
